PROFILE

Full-Stack Developer driven by curiosity, with hands-on experience building modern web applications from concept to deployment. I enjoy understanding how systems work, designing reliable backend services, and crafting responsive user interfaces. My focus is on building software that's secure, maintainable, and easy for teams to confidently build on.

EDUCATION

Suez Canal University | 2024-2028

BSC in Computer Science - Faculty of Computer and information

Undergraduate,(3rd Year) | GPA : 3.31

INTERNSHIPS

Backend Training - Huma Volve (July 2026) - Certification

learned the fundamentals of building backend applications, including project structure, models, controllers, routes, environment variables (.env), API testing using postman, working with MongoDB, and implementing CRUD operations.

SEF Academy (June 2025 - May 2026) – Certification

Completed 120+ hours of Full-Stack training covering React, Node.js, Express.js, and MongoDB. Built and deployed 5+ projects, developing end-to-end applications with RESTful APIs, authentication, database integration while emphasizing performance and using Git/GitHub for collaborative development.

Frontend Training - AfaaqWare (Mar 2026 - May 2026) – Certification

Completed a frontend development training program at Afaaqware, mastering Next.js, TypeScript, and Tailwind CSS. Applied Clean Architecture and Atomic Design principles, utilizing TanStack Query and Postman for API integration within professional Git Flow and team-based workflows.

PROJECTS

E-Commerce Frontend App | Live | GitHub

Built a responsive e-commerce web application using React, Redux, and Tailwind CSS, featuring product browsing, search, category filtering, and a fully functional shopping cart with real-time state management and dynamic price updates.

Full Stack Banking System | [User Demo](#) | [Admin Demo](#) | [GitHub](#)

Developed a full-stack banking system using the MERN stack, featuring secure JWT authentication, card management, money transfers, Stripe-powered deposits, withdrawals, real-time notifications, and a dedicated admin dashboard backed by a RESTful API.

E-Commerce Admin Dashboard | [User Demo](#) | [Admin Demo](#) | [GitHub](#)

Collaborated with a team to develop a responsive e-commerce platform featuring product browsing, filtering, shopping cart, wishlist, order management, and secure authentication. Integrated RESTful APIs using Axios and built a comprehensive admin dashboard for managing products, users, carts, orders, and store settings.

E-Commerce Backend | [Live](#) | [GitHub](#)

Built a RESTful e-commerce API with Node.js, Express.js, and MongoDB, featuring JWT-based authentication, role-based authorization, product and category management, user management, and shopping cart functionality.

Restaurant Website | [Live](#) | [GitHub](#)

Developed a responsive restaurant website using HTML, CSS, and Bootstrap with a focus on modern UI design and mobile-friendly layout.

Personal Portfolio Website | [Live](#) | [GitHub](#)

Built a modern portfolio website with React, combining responsive design, reusable components, and smooth animations to present projects, skills, education, training, and contact information in an intuitive interface.

SKILLS

React/Next.js

Nodejs/Express

HTML/CSS

Git/GitHub

Bootstrap/Tailwind

Javascript/TypeScript

MongoDB/PostgreSQL

Arabic/English
