PROFILE

Full-Stack Developer driven by curiosity, with hands-on experience building modern web applications from concept to deployment. I enjoy understanding how systems work, designing reliable backend services, and crafting responsive user interfaces. My focus is on building software that's secure, maintainable, and easy for teams to confidently build on.

EDUCATION

Undergraduate in Computer Science and Information

Suez Canal University

Grade: Very Good

09/2024 – 07/2028

Ismailia

INTERNSHIPS

Backend Training - Huma Volve

07/2026 – 08/2026

- learned the fundamentals of building backend applications, including project structure, models, controllers, routes, environment variables (.env), API testing using postman, working with MongoDB, and implementing CRUD operations.

Frontend Training - AfaaqWare

03/2026 – 05/2026

- Completed a frontend development training program at Afaaqware, mastering Next.js, TypeScript, and Tailwind CSS. Applied Clean Architecture and Atomic Design principles, utilizing TanStack Query and Postman for API integration within professional Git Flow and team-based workflows.

Full Stack - SEF Academy

06/2025 – 05/2026

- Completed 120+ hours of Full-Stack training covering React, Node.js, Express.js, and MongoDB. Built and deployed 5+ projects, developing end-to-end applications with RESTful APIs, authentication, database integration while emphasizing performance and using Git/GitHub for collaborative development.

PROJECTS

E-Commerce Admin Dashboard

- Collaborated with a team to develop a full-stack e-commerce platform spanning **26 pages** across the customer store and admin dashboard.
- Developed the complete **authentication flow**, including login, registration, OTP verification, password reset, protected routes, and authentication state management using **React Context API**.
- Implemented admin features including **user search, user creation UI, product creation and editing by ID, protected routes**, and **light/dark themes** with Tailwind CSS.

AI-Powered-School-Management-API

- Integrated **Google Generative AI** with Inngest to automate **AI-generated weekly timetables and MCQ exams**, including teacher/subject matching, exam generation, submission handling, and automated scoring.
- Developed a school management system using **Node.js, Express.js, TypeScript, MongoDB, and Inngest**, implementing **8 controllers, 8 data models, and 8 REST API modules**.
- Implemented secure **JWT-based authentication and role-based authorization** for protected school resources.

Full Stack Banking System

- Built a full-stack banking platform with **3 separate applications**, implementing **12 API route modules, 12 controllers, and 5 MongoDB models**.
- Implemented **JWT authentication & authorization**, card management, money transfers, transaction tracking, and **Stripe-powered deposits**.

- Developed an **admin dashboard** for managing users, cards, and transactions using **MVC-style backend architecture**.

Real-Estate-Marketplace

- Developed a full-stack real estate marketplace using **Next.js, TypeScript, Prisma, PostgreSQL, and Better Auth**, supporting property discovery and user authentication.
- Implemented **5 server actions** and a relational database schema with **5 Prisma models** for users, properties, sessions, accounts, and verification.
- Integrated **Cloudinary image uploads, Google OAuth, and Zustand state management**, enabling authenticated users to create and manage property listings and view detailed property information.

SKILLS

Front-End

Next.js, React.js, React Router, Redux Toolkit, Zustand, React Query, JavaScript (ES6+), TypeScript, Framer Motion, shadcn/ui, React Hook Form, Zod, Formik, Yup, Tailwind CSS, Axios, Bootstrap, HTML5, CSS3.

Back-End

NestJS, Node.js, Express.js, MongoDB, Mongoose, MVC Architecture, RESTful APIs, JWT, Socket.io , SQL, PostgreSQL, Prisma, TypeORM, Bcrypt.

Tools & Other

Git & GitHub, Postman, Swagger, Cloudinary, Stripe, Inngest, Google Generative AI, Data Structures, OOP, Algorithms.
